MorbideX[®]

Protective cushion - Adult/Pediatric

MorbideX[®] nasal pad is a soft mask liner. We developed MorbideX[®] to help patients with skin sensitivity and seal issues when wearing a mask.

MorbideX[®] reduces skin breakdown and facial sores, improves overall comfort, and reduce mask leaks.

MorbideX[®] has a revolutionary design that allows a greater degree of cushioning, which targets the bridge of the patient' nose and cheekbone, predominantly the most problematic areas.

MorbideX[®] unique design replicates shock absorbers, hence creates comfort for BIPAP and CPAP full-face mask users.

Hypoallergenic and latex-free: made from a polymer gel, the mask liner moisturizes your face by gradually and constantly diffusing small amounts of high-grade mineral oil onto your skin.

Fully washable MorbideX[®] is available in two sizes: adult and pediatric.

A single pad will last for approximately 30 days.

	Codes	Units per Case
ADULT	MBX-01	30
PEDIATRIC	MBX-02	30
